

Greetings Tim,

I would be honored to share some of my feedback relating to our meetings. It was so great working with you!

One of the most difficult challenges of any school leader is to adequately manage time spent on hundreds of different tasks that emerge every day in a school. The leadership coaching sessions with Tim helped me to focus on time that is absolutely necessary as a leader -- time to reflect. Tim helped me to think positively about my leadership and where I excel. He was also able to help me think and dream about how I can take my goals as a leader to the next level. We did this by focusing on areas where I knew I wanted to change or grow. Much of leadership is about putting out fires, but a far more important time for a leader is dreaming for the future. Tim helped me to have that dedicated time to "sharpen my saw" as a leader.

The biggest growth I experienced after working with Tim was getting stronger in my ability to be in the moment and to take time to think and reflect before trying to resolve an issue. I feel that I have grown as a collaborator and as a servant leader through my time with Tim. If I could, I would have meetings with Tim as a permanent part of my journey as a leader. Tim is caring, dedicated, and easy to talk with. He clearly cared about my personal experiences as a leader and helped me to focus on positive ways to grow.

Warm Regards,

Derek Daly, M.Ed
